

Endpoint selection and censoring boundary

Exact Interval/range One-sided Missing/unparsed

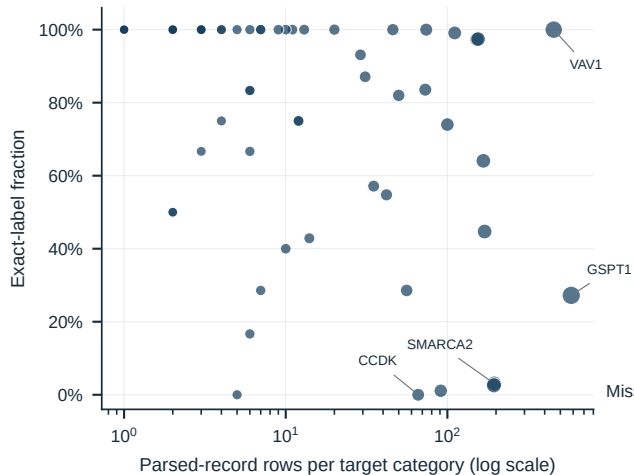

a Parsed DC50 record-table rows

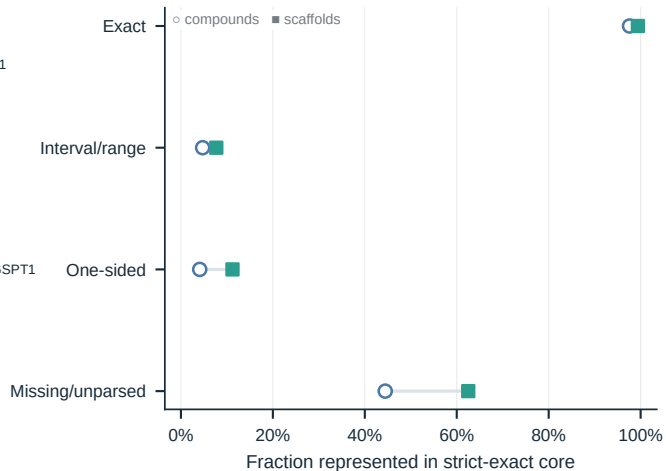

b Relation composition by source

c Exact-label fraction across target categories

d Structure overlap with strict-exact core

Panel c: all 74 target categories are shown; labels identify the three largest and the lowest exact fraction (at least eight rows). Counts denote record-table rows, not unique record IDs. Descriptive audit only; censored observations were not fitted as point labels.
